<b>Scope:</b>	<p><b>Covers</b></p> <ul style="list-style-type: none"> <li>• Surgical or laser treatment for rhinophyma where the purpose is cosmetic correction (e.g. reducing a bulbous/ruddy nose appearance)</li> <li>• Includes excision and/or laser techniques</li> </ul> <p><b>Out of scope:</b></p> <ul style="list-style-type: none"> <li>• Treatment to correct functional impairment due to rhinophyma (managed via appropriate clinical pathway)</li> </ul>
<b>Cohort:</b>	Patients with rhinophyma with no functional impairment seeking surgical or laser treatment primarily to improve appearance
<b>Other relevant Clinical Policy</b>	TBC

<b>Treatments routinely funded:</b>	None under this policy
-------------------------------------	------------------------

<b>Treatments not funded:</b>	The ICB will not normally fund surgical or laser treatment for rhinophyma with no functional impairment, including excision and laser treatment
-------------------------------	---

<b>Rationale:</b>	
-------------------	--

Surgical or laser treatment for rhinophyma with no functional impairment is considered a low clinical priority intervention. NHS commissioning is focused on interventions that treat disease or restore function; cosmetic procedures undertaken primarily to improve appearance are therefore not normally funded.

**IFR Statement Clinical Exceptionality:**

Where a patient does not meet the policy criteria or the intervention is not normally funded by the NHS, an application for clinical exceptionality can be considered via the ICB's Individual Funding Request (IFR) Policy and Process.
